

Cheshire West & Chester Council

PROTECT YOUR CHILD AGAINST FLU

Did you know that children under the age of 5 have the highest rate of hospital admissions due to flu?

It's not too late for your child to get vaccinated. Ask your GP or local health care provider about the nasal spray today.

What should I do?

Children aged 2 and 3 years are invited for a vaccination by their GP. If you haven't received an appointment, ask your GP about the nasal spray today. Children in reception year to school year 5 are offered the vaccine at school.
